Value at Risk has occasionally been described as 'the new science of risk management.'

Submit a report that critically evaluates the various sources of 'market-based risk,' the three main approaches to estimating a financial institution’s 'Value at Risk' and, finally, the importance of this 'number' in formulating overall regulatory capital requirements.

(Maximum 2,500 Words - excluding the index, appendix and bibliography, which should be not more than another 1000 words)

Guidelines

The report should include both qualitative and quantitative analysis of the sources of 'market-based risk' and VaR’s statistical assumptions.

It should also specifically emphasize the limitations and criticisms of current risk management practices and suggest possible regulatory responses.

Research Sources

Some of the suggested journals for literature review for your topic include but are not restricted to the following:

Journal of Finance
Journal of Banking and Finance
Journal of Risk
Journal of Risk Management in Financial Institutions
Journal Harvard Business Review
Journal of International Financial Markets, Institutions and Money
