Hjertets elektriske ledningssystem

Hjertefrekvensen styres av atrioventrikulärknuten (AV-knuten).

I sinusknuten oppstår spontane elektriske impulser som tar «ledelsen» over de øvrige hjertemuskellcelene

Den elektriske impulsen blir normalt sett ikke forsinket når den passerer gjennom AV-knuten.

Impulsvare i hjertet overføres fra atrer til ventrikler i sinusknuten.
